Web Announcement 2477

Provider Web Portal Registration Process Reminders

Registering for Provider Web Portal (PWP) access is required to use the secured features and is a separate registration process from enrolling as a Nevada Medicaid provider. The PWP relies on the Nevada Medicaid Management Information System (MMIS) to validate whether the user/provider is permitted access. Only one provider registration will have the ability to assign delegate access. Upon completion of the PWP registration, the provider will have the ability to assign delegates to perform secure transactions on the provider's behalf. Providers are responsible for maintaining their account, delegate access and updating the user profile as necessary.

For more information and instructions regarding the PWP registration process, refer to the [Electronic Verification System \(EVS\) User Manual Chapter 1 Getting Started](#).
